PROTECTION CONCEPT

The SEEDAMM PLAZA has developed a comprehensive protection concept. This can be viewed at the hotel on request.

We are also happy to answer your questions at info@seedamm-plaza.ch or by phone T+41 55 417 17 17.

→ **You are in good hands with us. Please let us inform you about the following further aspects:**

Temperature measurement:

In addition, our employees measure their temperature when they start work. If the temperature is elevated there is no access to the SEEDAMM PLAZA.

Air supply:

Our ventilation system draws in 100% fresh outside air. Separate air streams lead stale air outside - fresh outside air is heated and brought in. The continuously exchanged air volume guarantees a very high level of hygienically perfect air quality in SEEDAMM PLAZA.

Spacious rooms and high ceilings:

The SEEDAMM PLAZA has a large number of spacious and large rooms with high ceilings. This means that the minimum distance and our comprehensive protection concept can be used, which are all the times adhered to the events organized by us.

Hygiene checks and increased cleaning intervals:

Our public rooms, the WCs and also the hotel rooms are cleaned in increased frequency. The hotel rooms are cleaned by means of a final room and hygiene check and finally "sealed" by the housekeeper for the next guests.

Food presentation:

In general, the meals are individually packaged and offered for consumption in portions. Buffets are avoided as far as possible.
